

How I Stacked It

Lee Maughan
CEO at Green & Purple

PLEO

Expenses

“Expenses and credit cards used to be so painful for the clients and our teams but not with Pleo. The user experience is simple and fast meaning a much greater rate of providing copy receipts in a timely manner. There is complete flexibility over how credit is used and approved across the team that far exceeds what's available with high-street banking solutions.”

Payments

"We love the fact that new features are always being worked on and released to improve the app further. Mimo makes supplier payments very simple and their security features avoid duplicate or incorrect payments. The Mimo team are super friendly and so responsive in taking our suggestions on board."

Reporting

"We love the visual element of reporting using Fathom, it brings the client's numbers to life and so many founders are non financially minded so it helps give them clarity on their position. It's brilliant at connecting to multiple data sources meaning we can combine CRM and accounting data for example to produce truly insightful reporting."
