# Dext

## Automating Data Extraction from Receipts and Invoices

*"It takes some effort to set up, but Dext Prepare is invaluable for automating data extraction from invoices and receipts, making it well worth the initial time investment."*

## Payroll

*“With the ability to allocate employees to specific segments, Employment Hero is a solid solution for handling HR and payroll. It's particularly useful for businesses without an HR team.”*

## **Managing Global Accounts and Corporate Cards**

*“We appreciate its global reach and the ease of issuing corporate cards and managing employee expenses. From memory, we initially adopted Airwallex to simplify accepting international customer payments and then used it to provide employees with corporate cards.”*

# 4

## Subscription Billing

*“Chargebee is a must-have for managing high-volume subscription billing. The Xero integration is good, and we also value how well it integrates with HubSpot. While setup can be complex and the cost may be a deterrent, it’s worth the investment for subscription businesses looking to scale.”*

# 5

## Consolidated Reporting

*“Outstanding for automating data across various platforms. It allows us to create custom Power BI dashboards and reports, and easily pull data into Excel for ad hoc analysis. Plus, the customer service from Kevin and his team is exceptional. One of my favourite quotes from Kevin sums up the pain point dataSights solves: “life is too short to be exporting CSV files”.”*

# **Inter-entity Charges and Reconciliations**

*“Although relatively new to us, Mayday has been a game changer for speeding up month-end processes and making inter-entity charges and reconciliations far more manageable. It’s a huge improvement over our old process where we had to update the Excel loan matrix to confirm all loans balanced.”*
