How I Stacked It

Cathy Collins
Finance Director at
Pure Escapes

Mayday

Intercompany

"A complete game changer for our multi-entity business. Mayday has been essential for reconciling the intercompany loan accounts between our 5 entities, posting monthly recharges and has significantly reduced time reconciling invoices in the group bank reconciliation."

getmayday.com

Monthly Management Accounts

“Connects our Xero organisations with Google Sheets. G-Accon has automated our monthly management accounts, it automatically refreshes actuals for all our entities.”

accon.services

Dext

3

OCR

"Dext automates our accounts payable using OCR to extract invoice data and push it to Xero."

dext.com

4

Data Back-up

“As part of our IT and disaster recovery policy we back up all data going into Xero with Ledgerscope.”

ledgerscope.com

5

Reporting

“We use Tableau which integrates with Xero and our reservation system so that is currently sufficient for our reporting. However, I have also been investigating Fathom and think it’s a brilliant reporting tool. The ability to quickly view KPIs and do scenario-based 3-way forecasting is great and it also does multi-company consolidated reporting.”
