How I Stacked It

Ben Watiwat
VP Finance at Immutable
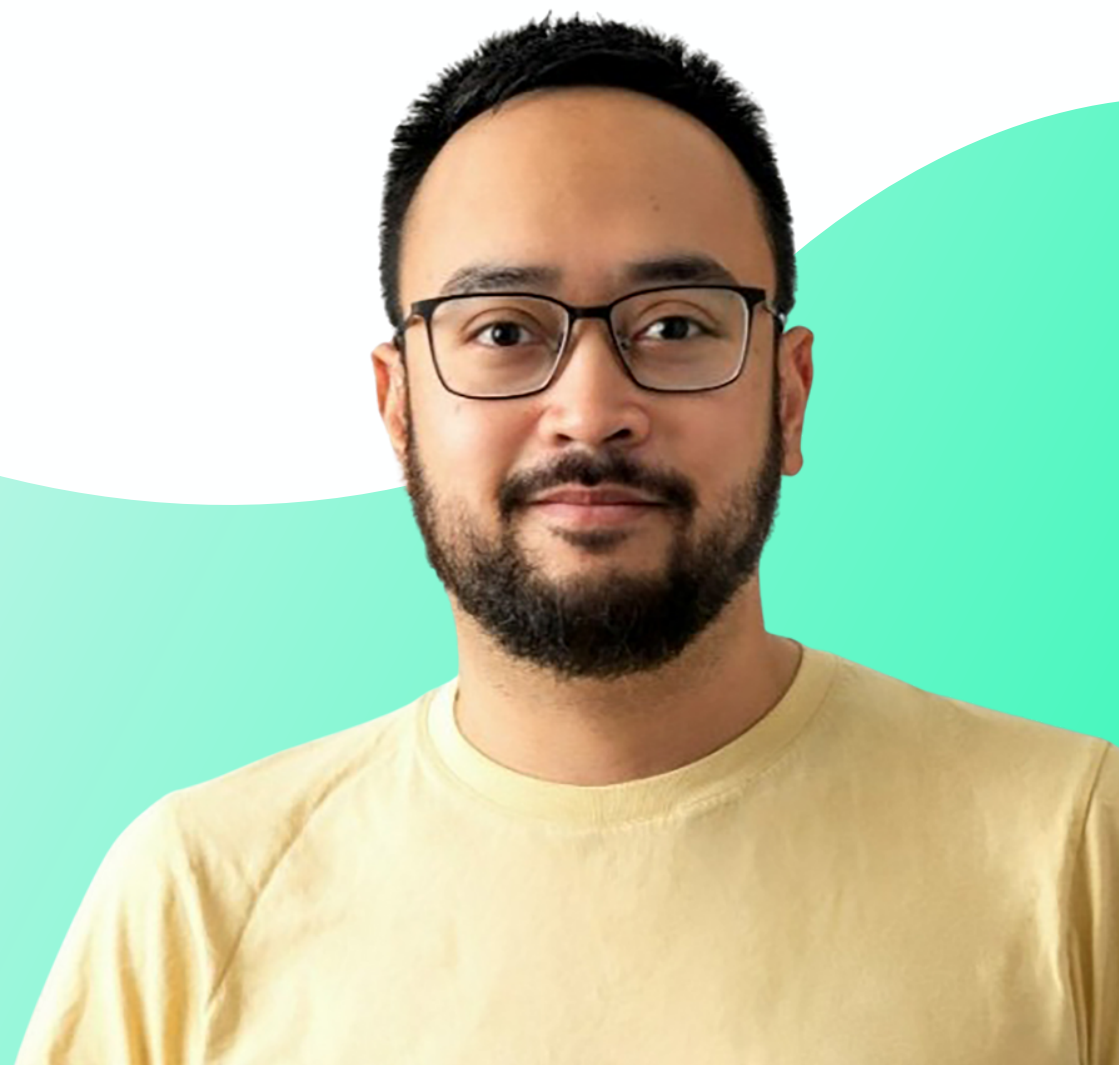

1 Reporting

Fathom combines insightful reporting, fast cash flow forecasting and actionable financial insights into one refreshingly easy business management solution.

"We need to produce consolidated reports across multiple businesses in multiple currencies, and I've found Fathom offers the best (and prettiest!) reports for this purpose."

airbase

2 Accounts Payable

Airbase is an all-in-one spend management platform.

"We implemented Airbase recently to consolidate into one tool for procurement, AP and reimbursements. Spend requests via email and expense claims using multiple systems just wasn't scalable. Airbase give us a single platform for the entire company to use making it easy to request, review and approve spend."

3 Month-End Close

Businesses use Numeric to streamline the month-end close, automate workflows, and generate real-time insights.

"Numeric helps us track and complete a multi-entity month end with full preparer and reviewer signoffs. The auditors love it."

Mayday

4 Intercompany Transactions

Recharge automation, cross-entity bank reconciliation and auto-balanced intercompany loan accounts.

"Mayday helps us get our intercompany admin in order. BRAG is a game changer."

5 Automated Google Sheets

G-Accon enables users to create, update, or delete financial records directly from Google Sheets, making data cleanups and reconciliations more straightforward and efficient.

"Like many other finance teams, we use G-Accon to send Xero data into Google Sheets."

6 Payments

Airwallex's software and APIs simplify global payments and financial operations.

"As a global business, we make payments across a number of currencies and countries. Airwallex allows us to make payments using local payment rails rather than through SWIFT, reducing fees for us and our vendors. There's also a direct integration with Xero so all transactions appear as a bank feed."
