How I Stacked It

Carolina Einarsson
CFO at
Essentia Analytics

Consolidation

Fathom combines insightful reporting, fast cash flow forecasting and actionable financial insights into one refreshingly easy business management solution.

"Fathom is a simple and efficient consolidation tool. Nothing overwhelming about it but it does the job and provides data that I can easily import into my reporting in Google Sheets."

Payhawk

Spend Management

Payhawk combines Accounts Payable, corporate cards, and expenses into one spend solution.

“This has been a game changer, we use Payhawk religiously every day. It is the place where we manage all of spend, which covers: AP, credit cards, supplier payments and private expenses. It works well in both regions and we have set up the necessary approval flows. Today we successfully close the month end in a couple of days, so that I can spend the rest of the month on strategic tasks, which is definitely thanks to this tool.”

3

US Payroll

Justworks is an all-in-one platform enabling employers to automate payroll, providing access to big-company benefits and HR tools.

"Justworks automatically processes our US payroll and also does all of our US-specific filings annually."

4

Treasury Management

An AI-powered spend platform

"We bank with local banks in each region, which works well (all of our payments are made through Payhawk anyway so we rarely use the normal banks for payments). We have set up Brex specifically to open a money market account where we can earn interest on our USD."

5

US Sales Tax

Anrok automates sales tax compliance across your financial stack, so you can grow your SaaS business in any market.

“Our most recent addition to the tech stack is Anrok and it is only connected to our US entity. It shows us where we have sales tax exposure, registers us in the necessary states and also does all of our filings. If you have a high volume of sales in the US, this is a must-have tool – sales tax can very quickly become complex.”
