# Intercompany

*"We've just implemented Mayday to move most of our transfer pricing and intercompany heavy lifting each month out of spreadsheets. It has been great so far and I can see us getting more and more value out of it as the software continues to develop and our intercompany requirements increase."*

## NZ Payroll

*"We use Xero Payroll for our NZ payroll. We use a separate PEO for our US payroll that is a no-brainer to allow us to keep our team lean while meeting all of the various compliance requirements for having staff in multiple states."*

[xero.com/uk/accounting-software/payroll/](https://xero.com/uk/accounting-software/payroll/)

# 3

## Invoice Processing

*"We email our invoices through to Xero, which then takes a first OCR go at drafting the bill in Xero. While there are tools that would improve this experience for us, none can compete with the cost/benefit of this feature in Xero (given we already pay for it!). Potentially as the number of bills we pay each month increases, we'll outgrow this and need to look at an alternative."*

# 4

## Expenses

*“For all of our credit card reports, and expense and mileage claims, we use Zoho. The flexibility of this tool and its ability to manage our credit card requirements over both NZ and US was key to its selection over other similar options. Ensuring that this is a digital and simple process, linked to Xero, helps our team focus on much more important things! There are definitely more complete solutions for lots of companies (Ramp/Brex/Bill.com etc) but we have found that for a small-ish multi-country group, they are not quite designed in a way that meets our needs yet.”*

[zoho.com](https://zoho.com)

# 5

## Financial Controls

*“For all of our approval flows for bills and invoices, we use ApprovalMax. Such a simple and intuitive way to improve the segregation of duties and ensure appropriate approvals for all bills, even in small organisations. No chasing for approvals really helps to free up time for our team!”*

[approvalmax.com](https://approvalmax.com)

# Consolidated Reporting

*"We use Fathom as our consolidation and reporting tool. We find this great for multi-currency consolidation and creating good-looking reports really simply and at a sensible price point!"*
