

CFO Techstack

How I Stacked It

Damien Ponweera
Finance Director at
Techspace

Spend Management

"All-in-one spend management, encompassing cards, invoices, and payments. Spendsesk is very useful, however, it doesn't yet operate exactly as we would like."

2

Consolidation and Management Information

"An amazing consolidation and management information tool which presents in PowerBI. Acterys is very powerful but can be quite challenging to set up and optimise."

acterys.com

GoCardless

3

Direct Debit

"GoCardless is our Direct Debit management tool for expenses and revenue coming in. Helpful but getting quite expensive!"

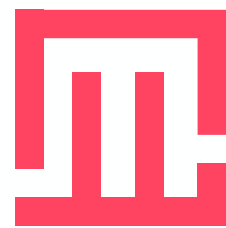

gocardless.com

4 Revenue Management

"Our revenue management tool, OfficeRnD allows us to bill and manage our customers."

Mayday

5

Intercompany

“Our team have found Mayday really useful. Our intercompany balances are now fully reconciled month to month and the ability to post interest and FX movements direct to Xero has been really key. Alongside providing flex office space, we also operate an Events business and sometimes payments can be made into the wrong company bank account. The BRAG feature has been paramount in helping us reconcile these directly and seamlessly.”
